WMNS 400 (Senior Seminar)

Welcome to WMNS 400 and congratulations! By enrolling in this class, this means you are nearly done with your WGS degree, nearly done with your undergraduate education, and ready to launch yourself into the future. And so the time has arrived for you start reflecting upon all that you have learned, carrying out a research project of your own design, and imagining all that you can do as you head out into the world that lies beyond UNL's hallowed undergraduate halls. With that in mind, the course is designed to help you accomplish the following 3 tasks:

- assemble your WGS portfolio
- design and carry out your final research project
- and plan for your professional future

The intent of this course is to be exploratory and organic, keeping these three tasks in mind. And the goal is to give you the opportunity to start reflecting, synthesizing, and pushing further the ideas you've gained from your WGS education. Throughout the semester I will thus engage you in this conversation and guide you through these important tasks. But most especially I am looking forward to all the things that *you* will be teaching *me* and *your peers*.

This course satisfies the ACE 10 requirement.
