Riparian Grazing Strategies

- Riparian grazing strategies are designed to maintain riparian habitat while providing forage for livestock.
- Riparian grazing strategies are designed to maintain riparian habitat while providing forage for livestock.
- Riparian grazing strategies are designed to maintain riparian habitat while providing forage for livestock.

Deferred Rotation

Continuous

Riparian Pasture

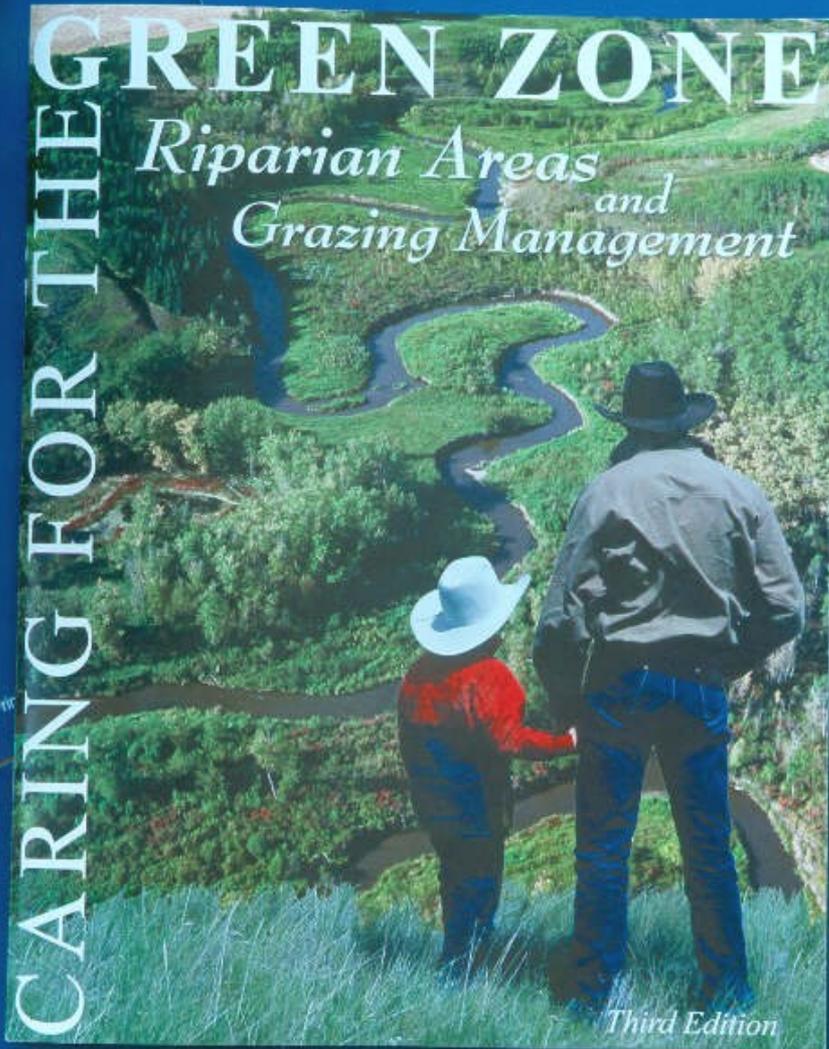

Distribution Tools

Corridor Fencing

System	Benefits	Drawbacks
Continuous	• Simple to implement	• Can lead to overgrazing
Deferred Rotation	• Allows for rest and recovery	• Can be more complex to implement
Riparian Pasture	• Provides forage in riparian areas	• Can lead to overgrazing
Distribution Tools	• Allows for targeted grazing	• Can be expensive to implement
Corridor Fencing	• Provides forage in riparian areas	• Can be expensive to implement

THE PROBLEM WITH THE
FUTURE IS THAT IT KEEPS
TURNING INTO THE PRESENT.

“The real substance of conservation [stewardship] lies not in the physical projects of government, but in the mental processes of citizens...all the acts of government, in short, are of slight importance to conservation except as they affect the acts and thoughts of citizens.”

Aldo Leopold 1937
