How to View Your Federal Student Loan Info

1. Go to nslds.ed.gov and click on “Financial Aid Review.” Next, click “Accept.” If you have already created an FSA ID, you can login with your username or email and password. If you have not yet created an FSA ID or if you are unsure if you have created an FSA ID, go to the “Create an FSA ID” tab to get started.

2. The chart will have a list of your federal Direct, Perkins, graduate PLUS, and consolidation loans. It will NOT have information on any private student loans you have (ex: from a bank).

3. The chart shows the loan amount, which is also called the loan principal. Next, it lists the date that you took out the loan. It will also shows your outstanding loan principal, and the outstanding interest for each loan. You must pay back the outstanding loan principal plus the outstanding interest, which will continue to accrue until the entire loan is repaid.

4. If you click on the number next to each loan, you can see more details about the loan, including the interest rate for that particular loan and the servicer for the loan.

5. You do not make loan payments on this website. You must make payments to your loan servicer. If you have not already, make an online account with your servicer by going to the website listed under the servicer’s information in the loan details.
