**LEARNER OBJECTIVES**

➤ Participants will describe the importance of involving peers in efforts to expand social relationships and learning

➤ Participants will identify how peer support and peer network interventions can benefit students with and without disabilities

➤ Participants will learn practical strategies for recruiting students, developing effective intervention plans, orienting students to their roles, and supporting them as they work together
CHANGES IN STAFFING RATIOS

What might be the unintended impact of relying too heavily on individually assigned paraprofessionals?

-Poll Question #1

DOES THE CONSTANT PRESENCE OF ADULTS INADVERTENTLY . . .

- Set students apart?
- Decrease contact between students and general educators other group leaders
- Hinder student learning and achievement
- Encourage unnecessary dependence on adults?
- Limit interactions with their classmates?
- Lead to misaligned instruction?
- Impact students in other ways?

SOCIAL RELATIONSHIPS IN SECONDARY SCHOOL

- 43% NEVER SEE FRIENDS OUTSIDE OF SCHOOL
- 84% NEVER OR RARELY RECEIVE PHONE CALLS FROM FRIENDS
- 50% NOT BEEN INVITED TO OTHER YOUTH’S SOCIAL ACTIVITIES DURING THE PAST YEAR

THE POWER OF PEERS

- Peers naturally turn to one another for support
- Peers are "experts" on social skills and other social norms
- Peers are not as "stigmatizing" as adults
- Peers are great problem solvers and can be quite creative
- Peers are widely available
- Peers can benefit themselves
- Peers are future employers, co-workers, neighbors, and congregation members

STRONG SCHOOLING FOR STUDENTS [WITH DISABILITIES]

- Peer Tutoring
- Peer Support Arrangements
- Peer Network Interventions
- Peer Partner Programs

PEER SUPPORT ARRANGEMENTS
PEER SUPPORT ARRANGEMENTS

➤ Facilitate student participation in class activities
➤ Provide frequent feedback and encouragement
➤ Model communication and other skills
➤ Promote interaction with other classmates and communication device use
➤ Support progress related to individualized goals
➤ Address behavioral supports, as appropriate and appropriately*

GENERAL EDUCATOR

PEER PARTNER

FOCUS STUDENT

PARAPROFESSIONAL

SPECIAL EDUCATOR

RELATED SERVICES

BASIC STEPS

➤ Identifying students with disabilities who need assistance to participate in class activities
➤ Recruiting peers from within the same classroom to help provide some of these supports
➤ Arranging for students to sit next to each other during class activities
➤ Orienting peers to their roles, explaining the rationale for their involvement, and showing them basic strategies for supporting the academic and social participation of their classmate
➤ Providing ongoing monitoring, feedback, and assistance to peers and their partners throughout the semester, as needed
➤ Shifting paraprofessionals to a broader support role within the classroom through which they assist all students, as directed by the teacher

EXAMPLES OF ACADEMIC-RELATED SUPPORTS

✓ Sitting next to the student during class
✓ Sharing notes
✓ Highlighting important information
✓ Brainstorming answers to questions together
✓ Inviting the student to join a group
✓ Making sure the student has a clear role in an activity
✓ Asking how the student is doing with an assignment
✓ Asking clarifying questions
✓ Helping organize assignments and materials
✓ Reminding the student about classroom routines
✓ Helping the student check their assignments
✓ Paraphrasing lectures or rephrasing key ideas
✓ Helping the student self-manage learning
✓ Offering additional examples of concepts or ideas
✓ Demonstrating how to complete a problem
✓ Highlighting important information
✓ Redirecting the student when he or she is off task
✓ Sharing class materials
✓ Reading aloud a section of an assignment or text
✓ Explaining how to do certain aspects of an assignment

Source: Carter, Moss, Asmus, Fesperman, Cooney, Brock, Lyons, Huber, & Vincent (2015)
EXAMPLES OF SOCIAL-RELATED SUPPORTS

✓ Sharing jokes with the student
✓ Encouraging interactions with other classmates, when appropriate
✓ Helping the student to “fit in” by learning social norms
✓ Reminding the student to use his or her communication book or device
✓ Giving advice on personal matters
✓ Offering emotional support
✓ Reinforcing communication attempts

ORIENTATION TOPICS

- Introductions
- Rationale for their involvement
- Background about the student
- Goals for the peer support arrangement
- General goals for the class
- Confidentiality and respectful language
- Expectations specific to the classroom
- Technology and communication systems
- Basic instructional and support strategies
- Student motivation and feedback
- When to seek assistance
- Other student-specific issues

Source: Carter, Cushing, & Kennedy (2009)

MONITORING THE PEER SUPPORT ARRANGEMENT

- Is the student seated next to the peer(s) with whom he or she is paired?
- Does the student have the same materials as his or her classmates (e.g., worksheets, books, lab materials, writing utensils, computers)?
- Are the student and his or her peers actively engaged in ongoing instruction?
- Is the work the student is doing closely aligned with work expected of the rest of the class?
- Are interactions among the student and his or her peers appropriate given the context or the types of interactions other students have?
- Are students completing class activities in a timely fashion or at a reasonable pace?
- Do the student and his or her peers appear to be enjoying working together?
- Are students truly working together? (rather than simply next to each other)
- Other: ________
- Other: ________

REVISITING SOURCES OF SUPPORT

➤ Can the student do it...
➤ ...on his or her own?
➤ ...if given the right technology or adaptations?
➤ ...if taught self-management strategies?
➤ ...with help from a peer partner or classmate?
➤ ...with occasional help from an educator or paraprofessional?
➤ ...with ongoing help from an educator or paraprofessional?
How might students with disabilities be positively impacted through peer support arrangements?

- Poll Question #2

**RESEARCH SUPPORT**

➤ More than a dozen studies have examined the efficacy and social validity of peer support arrangements in general education classrooms

➤ They have been implemented both core academic (e.g., math, science, language arts, social studies) and elective (e.g., art, band, chorus, computers, culinary arts, dance, digital arts, music, theater, wellness) classes

➤ Paraprofessionals tend to serve as facilitators, though this role can also be assumed by special and general educators

➤ Peer support arrangements are an “evidence-based practice” for improving social-related outcomes of students with severe disabilities

**PEER NETWORK INTERVENTIONS**
PEER NETWORK INTERVENTIONS
A social group established around a student with a disability that:
➤ Meets weekly to talk, participate in a shared activity, and plan/discuss interactions occurring outside of the group
➤ Helps the focus student become more involved in everyday school life and get connected to other school activities
➤ Receives regular guidance and support from an adult facilitator (e.g., coach, educator, paraprofessional)
➤ Lasts throughout an entire one semester

BASIC STEPS
➤ Identify interested students with a disability
➤ Identify a peer network facilitator (teacher, counselor, etc.)
➤ Identify and invite 3-6 peers to join the group
➤ Hold an initial orientation meeting with the peers
➤ Facilitate regular peer network meetings
➤ Arrange a mutually enjoyable activity
➤ Check in on weekly social contacts
➤ Encourage expansion of the network
➤ Provide ongoing feedback and support
➤ Reflect, fade, and maintain the network

What qualities or experiences would you look for in potential peer partners?

-Poll Question #3
SELECTING PEER PARTNERS

➤ Which peers share interests, hobbies, or activities in common with the student?
➤ Which peers have shown an interest in getting to know the student in the past?
➤ Which peers have consistent attendance?
➤ Who would model positive behaviors for the student?
➤ Which peers have good interpersonal skills?
➤ Which peers are themselves “on the margins”?
➤ Which peers are part of a larger friendship networks?
➤ Which peers have common time available with the student with a disability during the school day?

RESEARCH SUPPORT

➤ At least a dozen studies examined the efficacy and social validity of peer network interventions within inclusive K-12 schools
➤ These networks have been delivered in a wide variety of settings, including cafeterias, advisory periods, and extracurricular programs
➤ An array of staff have served as facilitators, including special and general educators, paraprofessionals, school counselors, coaches, club leaders, and others
➤ Peer network interventions are considered an “evidence-based practice” for improving social-related outcomes of students with severe disabilities

SELECTED RESEARCH FINDINGS RELATED TO PEER NETWORKS

 BENEFITS TO STUDENTS

• Social interactions take place at substantially higher levels when students with disabilities began participating in a peer network
• These interactions sometimes—though not always—generalized to other schoolmates
• Students developed significantly more friendships over the course of one semester; many of these friendship maintained one year later
• Students had significantly more social contacts in school with others, including peers outside of their network

 BENEFITS TO PEERS

• Peers report that they themselves benefit socially from being part of a peer network
• Some peers also indicate that they benefit academically from their involvement
• Peers indicate their views about disability and their schoolmates with autism have changed for the better
• Peers develop new friendships that last over time and sometimes spill
PEER PARTNER PROGRAMS

Formal efforts to create more welcoming school cultures, expand the quality of opportunities students with and without disabilities have to get to know and spend time with one another, and strengthen the social skills and friendships of all students. Examples include:

- Peer buddy programs
- Best Buddies high school
- Peer partner clubs

RESEARCH SUPPORT

- Peer partner programs are feasible to implement and reach a wide number of students
- They can be adapted to meet the needs of schools with different resources and cultures
- Peers attribute a wide range of benefits to their involvement
- Students with disabilities meet and develop friendships with a wide range of peers whom they might not otherwise have met
