IANR												
Communications Information Technology (CIT)	IANR will align its communications and information technology services more closely with those offered by University Communications and UNL's Information Services.	Avoids duplication while maintaining services critical to IANR communications and preserves extension and other specialty communication needs. Creates multidisciplinary programs in agricultural communications and food production studies among several colleges and programs.	\$ 1,404,000					0.20	4.43	5.50	1.23	1.16
