
GPQ Images Style Sheet

Permissions

- Please include complete permission information for all illustrations. Written permission from the institution or individual holding the copyright for all illustrations must be provided before publication and must include the following statement:
- *Nonexclusive rights are granted to reprint this illustration in both print and electronic formats for the life of the article.*
- All costs for obtaining and reprinting images will be the responsibility of the author.

Captions

All captions should be concise and include source and permission information. Please indicate insertion placement in your manuscript.

Figures

- All figures should be referenced in the text according to the Style Sheet.
- All figures should be 2 5/8 in. wide (1-column width) or 5 5/8 in. wide (2-column width) and no more than 7 1/2 in. tall so there is room for a caption under the figure.
- Figures may be submitted as black and white grayscale images or color images. The print version of the journal will be printed in black and white, while the e-journal may have color images.
- If you want your article to have color images in the print version, you may be requested to pay a fee to offset the additional cost.
- Scanned images must be a minimum of 300 ppi (pixels per inch).
- Do not insert graphic files into your article. Do not send figures as computer slide presentation graphics or word processing graphics.

Electronic artwork

- We accept line art and halftones on disk. If you are supplying the images on disk, please include a directory of files contained on the disk and a hard copy printout of each figure. Hard copy must match the digital file.
- Halftone images should be scanned at a minimum of 300 ppi (pixels per inch). Line art should be scanned at 1200 ppi. *Please note that nearly all images downloaded from or saved for the Internet or PowerPoint™ are in JPEG or GIF format and will be 72 dpi and are not acceptable for the printing process.*
- Indicate the file format of the graphics. We accept TIFF or EPS format; large jpeg files may be acceptable.

Maps

- Be sure you have placed a distance scale on your maps. Distance should be listed with a north arrow on the map.
- Enlarged details of maps should reflect the same area and shape of the map.
- Geographic places mentioned in the text should be shown on a map.
